

- Legend**
- SFRA Study Area
  - Dry Day
  - Fluvial Contribution
  - Wet Day

**Notes**

Maps showing the Environment Agency's Reservoir Flood Mpas. There are two flood scenarios shown: the "dry-day" and "wet-day". The "dry-day" shows predicted flood extents if the reservoir fails when rivers are at normal levels. The "wet-day" shows flood extents should the reservoir fail when river levels are already high and are experiencing natural fluvial flooding. The "fluvial contributions" layer is for reference only and shows the fluvial flood extents used to develop the "wet-day" scenario flood extents.
