# CYCLING BY TRAIN with Southern

# **East Coastway: Direct trains between Brighton and Ashford International**

Space on board these services, which are only formed of 2 coaches, is extremely limited at certain times including many summer weekends. Ordinary cycles may be carried so long as there is space available. Please note that wheelchair users will always take precedence for the multi-use space in our trains.

# Cycles

Fully folded cycles (see below) are welcome on our trains at anytime and should be fully folded and carried before going through the gateline.

# Definitions:

- Regular cycles (non-folding cycles). This definition also excludes tandems and tricycles.
- Fully folding cycles one which folds down to roughly the size of a briefcase (e.g. a Brompton). (See our cycle policy FAQs online for more information.)

Cycle reservations are not possible on Southern services, please follow the instructions of our staff who may ask you not to board if the train is especially full or where a regular cycle may cause a safety hazard or a nuisance to other customers.

# **Rail replacement buses**

For safety reasons, rail replacement buses are unable to convey regular cycles. Please check for any engineering works before you travel at **nationalrail.co.uk** or **08457 48 49 50**.

# **Cycle Policy**

Further details of Southern's cycle policy may be found at southernrailway.com/cyclepolicy.

# Off peak travel/non restricted services

Cycle space on board our trains is extremely limited and because cycle reservations are not possible on Southern services we cannot guarantee that space will be available. In the interests of the safety and comfort of our passengers, we reserve the right to refuse access where cycle spaces are already occupied or where services are especially busy, however our staff will assist with finding alternative services.
